BIENNIAL REPORT
AND RECOMMENDATIONS

OF THE

State Superintendent
of Public Education

(See Index in Back)

To the Legislature of Mississippi
For the Scholastic Years
1925-1926 and 1926-1927

State of Mississippi
Department of Education

Jackson,, Mississippi, September 1, 1927.

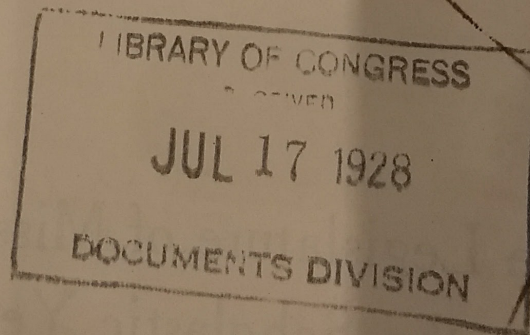

To the Legislature of the State of Mississippi:

Gentlemen:

In accordance with the requirements of the law, I herewith submit to your honorable body the biennial report of the Superintendent of Public Education for the scholastic years 1925-1926 and 1926-1927.

Very respectfully,

W. F. BOND,
State Superintendent of Public Education.

STATISTICAL REPORT II

THE SCHOOL POPULATION OF MISSISSIPPI

In any attempt to evaluate a program of public education, to determine its effectiveness or its scope, the student must ask and answer the question: "To what extent is the school population of a given area being reached with school advantages?" This question does not include factors of effectiveness of the school program, but simply the numbers of children eligible for school attendance who are really in school. School population is defined for the purposes of this report as all those children white and colored between the ages of 5 and 21 years inclusive. This definition is taken from the legal requirement imposed by the Constitution of Mississippi of 1890 and finds expression in the administration of the provisions for free public education in our enumeration of educable children, more generally known as our school census. More strictly the school population should be considered as those children between the ages of 6 and 18 years, but data is not available in Mississippi for those ages of a later date than 1920. Consequently, the following analysis is based upon the school census of 1925, upon school enrollment and upon average daily attendance in public tax-supported schools for 1925-26. In the following pages are listed the 82 counties of Mississippi and after each county the Municipal and Rural Separate School Districts of that county. These districts are independent districts, particularly as taxing units for school purposes and in the administration of school affairs.

The tables are presented in the following order:

TABLE I.—WHITE RACE

Column 1 gives the number of children enumerated in 1925, column 2 the number of children enrolled in school during the scholastic year 1925-26, column 3 the percentage the school enrollment is of the school census, column 4 the average number of children in daily attendance in school during the scholastic year 1925-26, and column 5 the percentage average daily attendance is of school enrollment.

BIENNIAL REPORT 1925-1927
TABLE III—WHITE AND COLORED RACES

Column 1 gives the number of white and colored children enumerated in 1925, column 2 the number of white and colored children enrolled in school during the scholastic year 1925-26, column 3 the percentage total school enrollment is of total school census for each county or Separate District, column 4 the average number of children in daily attendance in school for the scholastic year 1925-26, and column 5 the percentage average daily attendance is of school enrollment.

BIENNIAL REPORT 1925-1927
THE SCHOOL DISTRICTS

j. Total amount provided through local district sources, \$2,032,-002.01.

k. Amount provided through local districts per child in average daily attendance, \$6.44.

l. Per cent of total amount provided coming from local sources, 27.2%.

STATISTICAL REPORT IV.

**Disbursements of the Common School Fund and the Equalizing Fund for
the Scholastic Year Beginning September 1, 1926, and Ending
August 31, 1927.**

The tabulation below shows the amount of money received from the State Treasury for the scholastic year 1926-27 by each county and separate school district in Mississippi. The disbursements are made by counties and separate districts from two funds. First, the Common School Fund which is disbursed, one-third of the amount appropriated per annum, in October and two-thirds in February, on the basis of the number of children between the ages of 5 and 21 years inclusive. In the fall of 1926, each county and separate district received 92.75 cents per child enumerated in 1925. In the spring of 1927 each county and separate district received \$1,855.00 per child enumerated in 1925. The column below entitled "Common School Fund Fall 1926 and Spring 1927" shows the total of the combined Fall and Spring disbursements of the Common School Fund to the counties and separate school districts.

Second, the Equalizing Fund which is disbursed to counties on a basis of the educational need in each county and the effort the people of the county are putting forth in behalf of the education of their children. The Equalizing Fund is disbursed twice each year, the fall, about the middle of November, and the spring, about the middle of March.

The column below entitled, "Equalizing Fund Fall of 1926 and Spring of 1927" shows the total of the Fall and Spring disbursements of that fund to each county and separate district sharing the fund.

The tables below should be read as follows: "During the scholastic year 1926-27, Alcorn County received \$15,023.71 from the Common School Fund and \$26,575.00 from the Equalizing Fund, making a total of \$41,598.71 from the State Treasury." Items for other counties and separate districts should be read similarly.
